Crew Cabin 1	Beam 4.80		

Overview

This 2006 Aicon 56 Fly combines Italian styling with a practical three-cabin layout, generous outdoor living areas and a substantial interior refit completed in Istanbul in 2024. Privately owned and maintained by a full-time crew, she is offered for sale in Kos, Greece, at €295,000, VAT not paid.

Her main-deck saloon features curved leather seating, warm cherry joinery and a dedicated dining area, with large windows bringing natural light throughout. The galley is positioned forward beside the lower helm, keeping meal preparation conveniently connected to the main living space.

Accommodation comprises a full-beam owner's cabin amidships, a forward VIP double and a twin guest cabin, served by three bathrooms. A separate aft crew cabin with its own head provides additional flexibility for owners cruising with professional assistance.

Outdoor spaces are arranged for relaxed Mediterranean cruising. The sheltered teak cockpit offers space for alfresco dining, while the flybridge features a second helm, dining area, wet bar with sink and grill, sunpads and a bimini. Additional sunbathing space is provided on the foredeck.

Twin Caterpillar C15 diesel engines, rated at approximately 800 hp each, show 1,255 port and 1,257 starboard hours as recorded in September 2026. Reported performance is 28 knots cruising and 32 knots maximum, with bow and stern thrusters assisting close-quarters manoeuvring.

The 2024 refit included renewal of the interior and upholstery, together with Raymarine HybridTouch upgrades at both helm stations. Further equipment includes a Mase generator, watermaker, air conditioning, Fusion audio, a saloon television on a lift and televisions in each guest cabin. A Brig 3.40 m tender with a Mercury 40 hp outboard completes the inventory.

With her separate crew accommodation, updated interior and well-equipped deck spaces, this Aicon 56 Fly offers a compelling option for buyers seeking an Italian flybridge yacht for family cruising and extended stays aboard.
