Overview

BENETEAU OCEANIS 46.1 | FIVE CABINS & COMPREHENSIVE CRUISING EQUIPMENT

This 2020 Beneteau Oceanis 46.1 combines a versatile five-cabin layout with an upgraded 80 hp Yanmar engine, air conditioning, generator and solar panels. Under the same ownership since new, she is Greek-flagged with professional registration and offers a well-equipped option for buyers considering either charter operation or private cruising.

Accommodation comprises four double cabins and a bunk cabin, served by three heads with separate showers. The bright saloon provides a comfortable dining and social area, complemented by a fully equipped galley. Above deck, the teak cockpit, twin helm stations, bimini and sprayhood create a practical setting for sailing and relaxing at anchor.

In-mast mainsail furling, a furling genoa, bow thruster and electric anchor windlass simplify sail handling and manoeuvring. Navigation equipment includes a B&G chartplotter and autopilot, together with wind, depth and speed instruments.

Maintenance completed in 2026 includes engine and saildrive servicing, antifouling, replacement anodes, a rigging inspection and new batteries. Both sails were washed and repaired in March 2026, and the air-conditioning system was serviced in 2025.

A tender, outboard and full charter inventory are included. Her combination of flexible accommodation, cruising equipment and recent maintenance makes this Oceanis 46.1 an appealing proposition for family sailing or an established charter fleet.

Lying at Nea Peramos Marina, near Athens.

Specifications
